

Strategic Initiative Six:

Ensure Success for all Students: Butte College strives toward supporting growth and success for all students, regardless of race, gender, age, disability or economic circumstances¹ by creating an environment conscious of intersectionality in which every student can thrive and succeed

As an initial step in incorporating feedback from those working on this initiative, this draft synthesizes existing strategic plan objective language with proposed revisions tracked in Achievet.

At this stage, we are seeking constituent feedback for the strategic initiative “title” language and hope that access to the draft objectives and action items will provide the context and clarity needed to assess it, including its alignment with college priorities.

Feedback on the initiative language will be discussed in college council at our October 27th meeting. Further discussion of the objectives and action items will occur throughout this academic year, with the goal of seeking Board of Trustees approval of the revised plan by the end of the spring 2027 semester.

As you consider the attached draft, please keep in mind that the revised language must remain consistent with applicable law and regulations, including Education Code and Title 5, as well as Butte College’s Board Policies and Administrative Procedures. Within that framework, our feedback is important in shaping how the college articulates its priorities and approach to implementing the plan.

Constituent feedback will be brought back to college council for all aspects of the plan, with the Board of Trustees retaining final approval authority for revisions.
